MINING, BUSINESS AND STOCKS.

TINTIC DEVELOPMENT TO INCREASE OUTPUT

Expects to Ship Four Cars a Week After First of Next Month-Block Out Enough for Several Months,

Things are happening in the East Tintic district and if the work being done at the East Tintic Development company can be taken as any criterion, the district is going to blossom out into one of the liveliest places in Utah. On every hill in that part of Tintic hoists are busy and the engines are tooting and puffing. This week the Development company shipped two cars of ore. They were sent out Thursday and after Aug. 1, Manager Ralph Kellogg expects to have the mine in shape to ship regularity to the care of ore a week.

Aug. 1, Manager Ralph Kellogg expects to have the mine in shape to ship regularly four cars of ore a week.

The last car of ore shipped last week netted the company \$541, after taking out the freight charges for handling the ore to the Goshen siding, the railroad tariff and every other charge. After Aug. 1, it is believed that the company will have an earning capacity of between \$8,000 and \$10,000 a month.

The upraise from the 235 foot level to the cave level has been completed, and ore is now being taken out of the sides and bottom of the cave. Under the cave the management declares that it has blocked out sufficient ore for steady shipping for several months. On the 235 foot level the drift is in a face of solid ore, 14 feet wide.

The Gruth shaft has struck a lime formation and it is believed to be dolomite similar to that found in the Sioux before reaching the ore. For some time the shaft has had some good iron ore thickly sprinkled with lead spar, This has disappeared and the lime formation is now coming in.

Harvey Cluff, secretary of the Big Hill company, has returned to Provo from a trip to the district. He brought back with him some voin matter that is believed to be ore of almost commercial value. This was found in the face of a 561 foot drift on the 200 foot level. Wilford F. Giles has been elected a director of this company in place of E. D. Partridge, resigned. Secy. Cluff is now having an assay made of the specimens he brought back with him.

It is declared that prospectors are

It is declared that prospectors are busier in East Tintic this year than at any time before. Property is being taken up all over the district and some have even taken up ground down on the Goshen flats.

STOCK MARKET IS WEAK.

All Securities Showed Tendency To-

ward Lower Levels in Prices. The local stock market was decidedly slow today and securities showed a steady tendancy toward lower prices. The market appears to be sagging of its own weight and it is believed that The market appears to be sagging of its own weight and it is believed that present prices are, in no way accountable to the intrinsic value of the properties. Colorado, which is now exdividend stock, sold at \$1.57½, Crown Point, which all through the winter months held its own at a good standard has drifted lower and sold today at 12 cents. Grand Central was again on the don and course today. It was selling at the close at \$2.35. Iron Blossom was able to hold its own at 1.32½, Sloux Consolidated was selling at 1.07½ and \$1.10. South Columbus was lower today and sold at 31 cents. Every stock traded in was comarkably low. It is not because the majority of the properties are less valuable than they were six months ago, but brokers credit the present condition to the lack of interest taken by the investing public. Persons who wish to secure quick money through their securities are unable to get good prices on account of the lack of interest and the unwillingness of investors to absorb the stock. Most of the buying is declared to be done, so the brokers say, by persons looking for "snaps."

clared to be done, so the brokers say, by persons looking for "snaps."

The amount of business transacted during the week was better than it was last week. The number of shares of securities sold during the week was 501,890 and the amount represented by the sales was \$363,655.34.

The number of shares sold this morning was 34,250 and the amount that changed hands was \$29,689.

On the curb a large number of quotations were made and a number of stocks appeared. The only sale registered was Bingham Central Standard at 26 cents. Old American was offered at 1414 cents and a bid of 10 cents was made.

JACKLING RETURNS FROM MINES

Tells of Big Advances Made by Low Grade Coppers of Arizona And Mexico.

Upon his return from a trip to Arizona and New Mexico yesterday D. C. Jackling, general manager of the Utali Copper and other properties told of some of the developments now being made in the Ray Consolidated, Chino

and Gila properties.

At the Ray Consolidated he declared Philip Wiseman has resigned as general manager and Mr. Jackling is now eral manager and Mr. Jackling is now in charge of the property. Ernest Stenger has been appointed as generat superintendent of the property. At the Ray in excess of 28,000,000 tons of ore have been blocked out, and that par-tially developed is estimated at 15,000,-000 tons. Plans for the mill are nearly complete, the site selected and the first complete, the site selected and the first order for steel will be made in a few weeks. Sixty teams and 200 men are now working on the railroad from Ray to Kelton. A double compartment shaft capable of handling 5,000 tons of ore a day, will shortly be sunk to the 250 level. The company will build its own smelter and the mill at the prop-erty should be in operation within 18

Three drills are busy searching for ore in the Gila property which adjoins the Ray Consolidated and is owned by practically the same interests.

Mr. Jackling was also at Santa Rita,
N. M., where the Chino property is situated. This property has been worked
since 1804. The old workings were
along a contact between the lime and
the porphyry. No effort was made to the porphyry. No effort was made to mine the low grade porphyry. Drills are now being sent down 100 feet apart, forming squares, and flocking out the mineralization. A 135 ton concentrator is now at work on the property.

TINTIC ORE SHIPMENTS. The following were the ore shipments from the Tintic district for the week ending Fridally night; East Tintic Development 2 cars; Centennial Eureka 47; Uncle Sam 4; Bullion Beck 2; Eureka Hill 1; Colorado (to Bingham) 6: Sioux Consolidated 14: Beck 2; Eureka Hill 1; Colorado (to Bingham) 6; Sioux Consolidated 14; Grand Central 5; Victoria 4; Mammoth 1; *Iron Biossom, 36; *Colorado, 35; *Dragon Iron mine, 33; *Beck Tunnel 3; *Swansea, 4; Total 197 cars.

The following were the car loads of ore received during the week at the Tintic smelter: Day mine, Ploche, 7 cars; Horn Silver, Frisco, 1; Centennial-Eureka, 6; Victoria, 4; Grand Central, 5; *Iron Biossom, 36; *Colorado, 35; *Dragon Iron mine, 33; *Beck Tunnel, 3; *Swansea, 4 cars.

*Designate cars of twenty tons capacity, all others were the regulation sized cars.

CONCENTRATES.

"Uncle" Jesse Knight declares that the ore in the Colorado will be sought at greater depth. Winzes are being sunk in three places in the mine by Superintendent John Roundy and at the same time the company is drifting toward the Sioux end lines.

At the Verrington Copper property in the Mason district, the management in drifting on the 400 level opened a good ore body. A crosscut has been sent for 55 feet through ore from the foot wall side without the hanging wall making its appearance.

According to a special from Boston, F. Augustus Heinze is no longer the ruling spirit in Ohio Copper. A director of the company is quoted as saying that Heinze only retains an interest of 50,000 shares and a block of the bonds. James MacFarlane of Denver represents the majority interest. It is believed that Mr. Heinze's New York trouble has had its effect on the market and that he will probably retire from the board of directors. According to a special from Boston w. B. Andrew, a director in the Uintah Treasure Hill Coalition Mines company and a brother of R. L. Andrew, superintendent of th mine, has returned from an inspection trip to the property at Park City. Mr. Andrew declares that on the 255 foot level 14 to 16 inches of first class rock have been exposed. A cross cut is being sent out to tap the ore 50 feet further on the strike. The ore is declared to be in the contact and in the right position to lead strike. The ore is decared to be in the contact and in the right position to lead to a large body. On the 600 foot level it will be necessary to drift 500 feet to reach the ore body. The property has reached a very interesting stage.

BANK STATEMENT.

New York, July 17.—The statement of clearing house banks for the week shows that the banks hold \$31,569,200 more than the requirements of the 25 per cent reserve rule. This is an increase of \$2,506,300 in the proportionate cash reserve as compared with last week. The statement follows:

Leans

BUSINESS NOTES

Interest in the additions and in acreage within easy distance of the city keeps up reasonably well in spite of the hot weather. Some difficulty is keeps up reasonancy wen in such the hot weather. Some difficulty is experienced in getting people to visit the additions during the heat of the day, and an effort is being made to take day, and an effort is being made to take prospective buyers out to the various offerings in the evening. This has been done all the week by the Emigration Canyon Improvement company, which has sold a number of lots in Maple canhas sold a number of lots in Maple can-yon for summer homes. There has been some demand during the week for land in the vicinity of Twenty-first East and Twelfth South streets, where J. R. Smith sold five acres this week for \$3,500. An option has also been given on a number of other acres of the old Huskinson farm in that neigh-

If so, take advantage of our special offer, made to aid the great missionary work. We send the paper one year to any point in the United States, Canada or Mexico at half price, \$1.00. This does not apply to points where there are regular wards or staken

MARKET DULL DURING WEEK

Caused Stocks to be Tenaciously Held.

UNION PACIFIC'S NEW RECORD | THE SITUATION IS IMPROVING

Shares Sold-General Gains And Losses Small.

New York, July 17,-Aside from the re-

markable advance in United States Steel,

has been halting. Stocks are tenaciously held in view of the signs of returning prosperity, the good promise for the rops and the sustained use of money. The possibil'y of an interruption to these influences were indicated in the week's uneasiness over rains in the winter wheat harvesting sections, the drouth in Texas, and the effect on the money, slight though it was, of the week's heavy requirements. The subsidence of the currency movement in New York, the engagement of gold abroad for shipment to Argentine, suggest money market

future of greater demand. Union Pacific made a new high record during the first hour of trading on the stock exchange today, selling up to 197. an advance of 314 points from last night. The first hour's sales exceeded 40,000 shares. United States Steel common also touched a record mark, selling at 73 on active trading. There was no news accompanying the advance in Union Pacific

companying the advance in Union Pacific today, but it was said London bankers were buying against calls on the stock purchased by American bankers some time ago.

There was no well defined tone in the opening stock market today. Small gains and losses were mingled and the trading was dull. United States Steel sold unchanged to ½ higher. Louisville & Nashville and Republic Steel preferred rose 1. United States Steel fell into the background as a feature, first place being taken by Union Pacific, which made a rapid and sensational rise of 3½ to 1973. The jump in the stock was attributed in part to a squeeze of the short interest. Other rallroad stocks were strong but there was but little change in the specialties. United States Steel touched 73. Reading gained 1½ and Southern Pacific, Great Northern preferred, Northern Pacific, Wabash preferred, Northern Pacific, Wabash preferred, Northern Pacific, Wabash preferred, Northern Pacific, Great Northern preferred, Chattanooga & St. Louis deional Pump 1. Nashville, Chattanooga & St. Loujs de-

Assivitie, Chattanooga & St. Louis declined 3.

The market closed irregular. Union Pacific touched 198¼ and Southern Pacific was run up 1½ but the United States Steel stocks were pushed for sale, the preferred losing 1 and the common receding to 72. These conflicting movements kept the market confused.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago. July 17.—Ideal weather for harvesting in this country again dampened the enthusiasm of the bulls in the wheat pit and caused moderate weakness during early trading today. The opening in July was ¼ to ic. lower at 1.21 to 1.21%. Buying by shorts forced the price up to 1.22, but it soon dropped back a trifle on profit-taking.

The corn market was also bearishly affected by the good weather conditions. July opened ¼ to ¾ lower at 69 to 69° and for a time held within that range. A break of nearly 2c, in the price of the July delivery marked early trading in oats. Rapid advancement in harvest operations due to the return of clear weather, was the chief weakening influence. The opening on July was ¼c. lower at 46%. Within the first few minutes the price had dropped to 45¼.

Provisions were dull and the market was easy owing to a 54/10c. decline in live hogs. Prices at the opening were 2½ to 7½c. lower.

Wheat—The market was a nervous affair all day. Late in the session considerable weakness again developed and the market closed at about the lowest point of the day. Final quotations on July were off 1½ at 1.20¼.

Corn—Covering by snorts caused a steadier feeling during the last half of the day and July advanced to 63%. The close—Wheat—July, 1.20½. Sept., 1.11%; Dec. 10.75 do 10.5 dec. 10.75 dec. 10.5 de

lose was steady to 63%; Close—Wheat—July, 1,20%; Sept., 1,11%; Close—Wheat—July, 1,20%; Sept., 1,105%; Dec., 1,075%; Corn—July, 63%; Sept., 65%; Dec., 56; May. 56 55. Oats—July. 45 12; Sept., 41 1/2@ 56; Dec., 11 1/2; May. 43 1/4; Pork—July. 20.65; Sept., 20.80; Jan., 17.80.

ALL BUSINESS SHOWS GAINS

Evidence of Returning Prosperity Each Week but a Record of Greater Activity in Both Industry and Commerce.

Went to 1974-Forty Thousand Progress in Tariff Revision is One Cause-Iron and Steel Trade Wonderfully Active.

> New York, July 16.-R. G. Dunn & Co.'s Weekly Review of Trade tomor-

row will say: Each succeeding week has now beome a record of advancing activity n industry and commerce. The extraordinary expansion in the iron and steel trade continues and whereas a short time ago the problem was how to find business now the problem is becoming that of meeting orders with adequate dispatch. The general business situation is improved by the progress made in the work of tariff revi-

Woolen and worsted fabrics are being opened for spring in men's wear and opened for spring in men's wear and dress goods, and buyers are active. In underwear and hosicry the buying has been on a larger scale for spring and also for fall. Many knitting mills are forced to run overtime to catch up orders. The demand is less active, but prices are firmly held.

The leather trade is quiet, but prices are strong and higher. are strong and higher.

AUTO AND TRAIN IN FATAL COLLISION

New York, July 17 .- One man was killed and three others badly injured as a result of a collision of a Long Island railway train with an automobile three miles from Long Island City today. The machine belonged to Archie D. Tappan of New York. Edward Hurley of Glen Cove was killed, Allen Perry of Sea Cliffe suffered a concussion of the brain, and Mr. Tappan was internally injured and his leg broken, Patrick Monahan, a passenger on the railway train, fell from a trestle on which he had walked to see the wrecked automobile and probably was fatally injured. fatally injured.

LATE LOCALS.

New York Banker Coming—F. E Farnsworth of New York, secretary of the American Banking association, will be in the city tomorrow, from the west, as the guest of Frank Knox.

Dedication of Organ-Mrs. Emma Ramsey Morris and Prof. McClellan will appear as the artists in the recital dedicating the new pipe organ in the Springville tabernacle, on Wednesday evening next,

Bunch of Keys Found-Postmaster A. L. Thomas has a bunch of keys at his office which were turned in last night by carrier R. E. Smith, who reported having found them in the letter box at State and Second South street.

spector Frazier went up to Farmington yesterday, to see a dairyman whose nilk is being sold here below the standard. The dairyman said the reason there was so much water in the milk was because his cows had been drinking heavier than usual, and there was more water than the solid could conveniently absorb.

Provo Will Help—In reply to letters sent out to all the Commercial clubs of the state asking for co-operation of the state asking for co-operation in making the coming state fair a success the first answer was received today from J. C. Anderson, secretary of the Provo Commercial club, stating that five members of the club had been appainted to co-operate with the directors of the fair. They are A. F. Ahlander R. E. Allen, William Boulers W. Listert P. W. Ahlander R. E. Allen, William Roylance, W. J. Startup, R. W. Brere-

PERSONAL.

President S. O. Bennion of the Cenral States mission has arrived from ndependence, where he reports everything in good condition. He will renain in Utah several weeks, attending to business affairs.

IRRIGATION VALUABLE.

Productivity of Land Increases from \$20 to \$500 Per Acre.

Irrigation has not only increased the productivity of land from \$20 an agree to from \$100 to \$500 an acre, but it has made it possible for the man of small means to become possessed of a tract of land which gives a home for his family and provides sustenance and a surplus. It is this feature of development that will be the great factor in population building on the Pacific

Irrigation is doing much for Oregon especially in the eastern and southern parts of the state. Extensive wheat areas, such as were formerly found in Umatilla county, for instance, are being changed into small farms devoted to fruit and mixed farming. The in portance of the government irrigation projects in the Klamath country of Oregon depends more on the object esson it gives to the people than or he amount of land that is being de-

Intensive farming on irrigated land means a breaking away from the old methods of agriculture, and intensive farming with diversified crops. in Oregon is changing the characteristics of the communities, for with closer bonds coming from increased number farms there is a social as well as agri-cultural development, and a consequent broadening of civilization.

In the Rogue river valley, cormerly given over to wheat and live stock, is now the home of the "big red apple" and the Barlett pear, producing such enormous crops as to cause the accuracy of the report being questioned. A net return of \$500 a year per acre, not for a single or exceptional year, but year after year, from apples or pears, is the rule in this valley, and this from land formerly thought to be profitable. land formerly thought to be profitable when it yielded from \$35 to \$40 an acre gross. Irrigation and intensive cultivation have wrought the change, and now the fruit of this valley finds market not only in the eastern cities of the United States, but brings even higher prices in the lands across the Atlantic, with increased freight charges, than it does in our own country—Review of loes in our own country.-Review of

GET POWER FROM SUN.

GET POWER FROM SUN.

Ericsson did not live long enough fully to work out a plan for getting power from the sun's heat, though he saw that great industrial possibilities might attend a satisfactory solution of the problem. According to Engineering News, other inventors are still giving it attention. Though the outcome of their labors is uncertain, it is evident that a little progress has been made in the last two or three years. The great Swedish engineer proposed to use a huge concave mirror to concentrate the sun's rays on the boller of a steam engine. In recent experiments this device has been abandoned because mechanism must be provided to move the mirror so that it will conform to the changing position of the sun in the heavens. It has been obvious also that some method of storing the sun's heat must be provided, so that its effect may be in some measure equalized during the day. The object is now partly accomplished in an ingenious fashion. A shallow, stationary tank, containing water is, covered with heavy glass, which acts like that in a greenhouse. It freely admits this sun's heat, but checks escape. The temperature, of course, does not remain uniform; but by using only a part of the heat during those hours when it is supplied most liberally and holding part in reserve an approximately steady action is feasible.

have established in connection with our paper, a Patent Bureau, and invite the co-operation of Inventors, Mechanical Engineers Draughtsmen, Machinists, Superintendents and Foremen of Shops and Mills, Skilled Mechanics in all trades, Farmers and all others, in building up a patent system, that will give honest advice to investors, protect their interests by good pat-ents and strong contracts; a sist

Inventors in perfecting their inventions, and in selling their patents when obtained; and in all matters to render careful service and give full value for money paid.

We have associated with us at Washington, D. C., an attorney who has been in continuous practise for the past twenty years, and we are in position to guarantee that any patent matters placed in our hands will receive

prompt and careful attention, and that the charges will always be moderate.
We also, in addition to securing of patents, obtain Trade-Marks, Copyrights, Labels, De-sign Patents, and in fact trans-

act business of all character in this line. All patents secured through our Bureau will be advertised for sale at our expense, and will thus be brought to the attention of the thousands of readers and ma-terially assist the inventors in dsposing of their patents. If you have made an invention, send us a rough sketch and de-

send us a rough sketch and de-

scription with \$5, and we will have our attorney make a thorough search of the records of the United States Patent Office. and advise you as to the secur-ing of patent, the cost and the maner of proceeding. Patent Bureau, The
